

Turn Pyrolyzed ELTs into **High-Value,** **Sustainable Pellets**

Mars Mineral's pelletizing technology, pilot-scale testing, and material science expertise are essential for transforming recovered carbon black (rCB) into market-ready pellets.

These revenue-generating pellets drive a circular economy by enabling reuse in applications such as green tires, battery storage, construction materials, and more.

Leverage our 53 years of experience working with tire recyclers and pyrolysis producers worldwide. Contact mpisani@marsmineral.com or call +1 724-538-3000.
